

Hello my name is all: Alienyor and solo I am a designer of tools, that is to say a drawer.

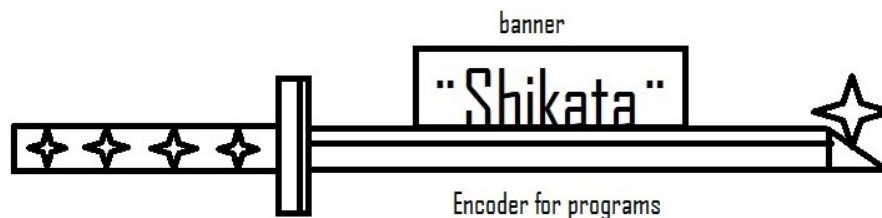

This is a design of a new tool for github I hope that some good programmer may program this tool. I only contribute the designs and you or another programmer reality will do her. You can be present at my designs because are free. That everything be for the sake of the community worldwide hacker. Greetings and luck to wholes that he program the best.

You, discharge this PDF and observe the design, and if he might program the tool. Remember than everything pannier stop, the community of programmers and of hackers of whole the world the tool is supposed to be written in python.

Note Important:

This new tool that does the fact is that the shikata utilizes the encoder ga nai to pass him to the executable right now, be .exe .apk .etc

I lay plans and drawing

Created by: Name for autor...

Site: <https://github.com/other....>

Ejemp: shikata.py -i trojansC.exe -o trojansC.exe -e 5
shikata.py -h or --help

-h or --help	----Help
-i	---- Input program
-o	---- Output program
-e	---- Pass the encoder -max 5

Note : The program happen the encoder: Shikata ga nai to the executable

The executable: **Shikata.py**

The only tool is supposed to take the requests nesenary

Simply the shikata will protect the extensions with the encoder ga nai
